

An Evidence-Based Approach to Neuropsychology: A Comprehensive Guide for Practitioners

Overview

Neuropsychology is a specialized field of psychology that focuses on the relationship between the brain and behavior. Neuropsychologists assess and treat individuals with neurological disorders, such as stroke, traumatic brain injury, and dementia. Evidence-based practice (EBP) is a systematic approach to clinical decision-making that uses the best available evidence to guide practice. EBP has been shown to improve patient outcomes and reduce costs.
