

Building Pathology, Durability and Service Life: A Comprehensive Guide for Building Professionals

Building pathology is the study of the causes and effects of building failures. It is a multidisciplinary field that draws on knowledge from engineering, architecture, materials science, and chemistry. Building pathology can be used to prevent failures, diagnose existing problems, and develop repair strategies.

Building Pathology, Durability and Service Life (Building Pathology and Rehabilitation Book 12)

Durability is the ability of a building to withstand the effects of time and use. It is influenced by a number of factors, including the design of the building, the materials used, and the environment in which it is located. Service life is the period of time that a building is expected to function as intended. It is influenced by the same factors that affect durability, as well as by the maintenance and repair practices that are followed.

This book provides a comprehensive overview of building pathology, durability, and service life. It is written for building professionals, including architects, engineers, contractors, and facility managers. The book can be used as a reference guide for solving building problems or as a textbook for students in the field.

Table of Contents

1. to Building Pathology
2. Causes of Building Failures
3. Diagnosis of Building Failures
4. Repair and Rehabilitation of Building Failures
5. Durability of Building Materials
6. Service Life of Buildings
7. Case Studies of Building Failures

Benefits of Reading This Book

- Gain a deep understanding of the causes and effects of building failures.
- Learn how to diagnose building problems and develop repair strategies.
- Get up-to-date information on the latest building materials and technologies.
- Extend the service life of your buildings and reduce maintenance costs.

About the Author

Dr. John Smith is a leading expert in building pathology. He has over 30 years of experience in the field, and he has written numerous books and articles on the subject. Dr. Smith is a member of the American Society of Civil Engineers and the American Institute of Architects.
