

Modern Dilemmas for Solo Moms and Dads: Navigating the Challenges of Single Parenting

Single parenting is on the rise in the United States. In 2019, there were an estimated 10.5 million single parents in the country, up from 7.2 million in 1990. This increase is due to a number of factors, including the rising divorce rate, the increasing number of women having children without being married, and the growing number of people who are choosing to adopt or foster children.
