

Transforming Food Systems After COVID-19: A Must-Read for Rebuilding a Sustainable Future

The COVID-19 pandemic has had a profound impact on our food systems. It has disrupted supply chains, caused food shortages, and increased food insecurity. It has also exposed the underlying vulnerabilities of our food systems, which are based on a globalized, industrial model that is unsustainable and inequitable.

2024 Global Food Policy Report: Transforming food systems after COVID-19 by International Food Policy Research Institute

Paperback	: 158 pages
Item Weight	: 13.1 ounces

This book provides a comprehensive analysis of the challenges and opportunities for transforming our food systems to make them more resilient, sustainable, and equitable. It brings together leading experts from around the world to provide a comprehensive overview of the current state of food systems and to propose innovative solutions for the future.

The book is divided into three parts.

1. Part 1: The Challenges of Transforming Food Systems

This section examines the challenges facing our food systems, including climate change, biodiversity loss, and food insecurity. It also discusses the role of food systems in contributing to environmental degradation and social inequality.

2. Part 2: The Opportunities for Transforming Food Systems

This section explores the opportunities for transforming our food systems to make them more sustainable and equitable. It discusses the potential of agroecology, urban agriculture, and other innovative approaches to food production and distribution.

3. Part 3: The Way Forward

This section provides a roadmap for transforming our food systems. It outlines the key policy changes and investments that are needed to create a more sustainable and equitable food future.

This book is a must-read for anyone who is interested in transforming our food systems. It provides a comprehensive overview of the challenges and opportunities involved in this complex task, and it offers valuable insights from leading experts around the world.

By working together, we can create a food system that is sustainable, equitable, and resilient. We can build a food system that nourishes people and the planet.
